SEMINARIO INAUGURALE del Corso
"Knowledge Engineering and Artificial Intelligence"
del Prof. Beniamino Di Martino - Ingegneria Informatica Magistrale

Responsible Artificial Intelligence

Lunedi 18 Settembre 2023 - ore 16:00
Dipartimento di Ingegneria - Aula Magna - Via Roma 29, Aversa

In this talk, after briefly introducing the History of AI, I'll concentrate on recent developments that aim at building responsible AI systems centred on human values and with explainable properties. Responsible AI is a wide-ranging field encompassing many open questions regarding the moral, legal and technical issues that arise with using and designing ethically-compliant autonomous agents.
Under this umbrella, the computational ethics area is concerned with formulating and codifying ethical principles into software components. I will look at a particular problem in computational ethics: engineering moral values into autonomous agents.

Speaker

Carles Sierra
Director, Artificial Intelligence Research Institute (IIIA-CSIC) of Spanish Research Council President of EurAI
Adjunct Professor, Western Sydney University (WSU)
